## INTRODUCTION TO WINSOFT THULUTH PRO

This typeface was created to work in harmony with any Latin serif typeface. It is based on a traditional Thuluth style. The Light weight is suitable for body text. The Bold weight is suitable for headlines and sub-headings. Also these two weights are suitable for any document headings or any other creative requirements.

This font includes identical glyphs for Windows and Macintosh, which makes it recommended for a cross-platform use.

## INTRODUCTION TO OPENTYPE FONTS

OpenType “.otf” fonts are compact single-file cross-platform fonts, which can have extended language support based on Unicode, and enhanced typographic layout features. For OpenType information, including application compatibility notes, Glyph Complement PDFs, and Specimen Book PDFs, visit Adobe’s Web site at <http://www.adobe.com/type/opentype>.

## FOLDER CONTENTS

This presentation pdf and 2 font files (one style per file) :

WinSoftThuluthPro.pdf

**Light** : WinsoftThuluthPro-Light.otf

**Bold** : WinsoftThuluthPro-Bold.otf

## OPENTYPE FEATURE HIGHLIGHTS

The most prominent OpenType layout features in these fonts are: Arabic/Hindi/Farsi digits, Farsi and Northern African dialects specific letters, standard ligatures and diacritic positioning. Note that the choice of which OpenType features are supported is specific to each application.

## FONT MENUS

In a few Windows applications, instead of every font appearing on the menu, all styles are only accessible by use of the italic and bold style buttons.

## LANGUAGE COVERAGE

Roman, Arabic, Arabic used in North Africa and Farsi (including the ligature Heh with yeh above and the narrow non breaking space).

## WINDOWS CODE PAGES SUPPORTED

1252 Latin 1

1250 Latin 2: Eastern Europe

1256 Arabic

## MAC OS LANGUAGE SUPPORT

On Mac OS 9.x only the MacRoman encoding is supported for OpenType font. Therefore support for Arabic and Farsi will be available only in Adobe ME applications. For this reason you have to install the fonts (the 2 .otf files) in Adobe font folder : HD\Application Support\Adobe\Fonts.

Mac OSX.1.5 is still not supporting Arabic. This support should be available in future Mac OSX releases.
